The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 09/736,408	Applicant(s) FIELDS-BABINEAU, MIRIAM	
	Examiner Kimberly S. Smith	Art Unit 3644	

- The MAILING DATE of this communication appears on the cover sheet with the correspondence address -

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 11/08/07 has been entered.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 25-45 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The claims have been amended to include a limitation "wherein the second type of material is more elastic than the nylon strap material." Support for this was stated to be on page 3 of the initially filed specification. However, the specification is silent to this limitation. That being, the specification states that the material is more elastic than the nylon strapping used in other head halters. As such, the specification does not provide a basis for the comparison of elasticity between the materials used in the Applicant's invention as claimed, only that the

Art Unit: 3644

material used in the Applicant's invention is more elastic than that used in other head halters.

Page 1 of the specification, last paragraph states that "All five head halters use nylon strapping with abrasive edges" (directed to the prior art inventions) and then states at page 3, last paragraph that "All the parts are flat with rounded edges" (directed to applicant's invention). As such, the flat nylon strap used in the present invention is differentiated by the Applicant's specification as being different from that used in prior art applications and a such, the elasticity of the second type of material being more elastic than the *other* head halters does not provide the support for relative comparison between the materials used in the Applicant's claimed invention.

Response to Arguments

4. Applicant's arguments filed 11/08/07 have been fully considered but they are not persuasive. The Applicant's arguments with respect to the elasticity of the prior art inventions is deemed moot in view of the above detailed rejection.

5. The Information Disclosure Statement filed 07/08/05 has been considered and is submitted herewith.

6. With respect to the book published by the Applicant, the book was considered by the Examiner on February 2, 2002 as indicated by the Examiner's initials on the PTO-1449. No further comment is deemed necessary.
